Press Release

New Partnership Blends Physical and Information Security Services

A new partnership between xDefenders of Fairport, NY and Business Protection Specialists (BPS) of Canandaigua, NY offers comprehensive vulnerability and risk assessment, security system engineering and design physical, emergency response and information Security Services. Now, through this coordinated effort, all aspects of security can be considered when designing new facilities, planning for regulatory compliance or when major incidents occur.

xDefenders Inc., an information-based Managed Security Services Provider (MSSP) and BPS a physical security consulting firm, have joined forces to offer clients a complete Suite of Security Services and unique viewpoint. The partnership was forged to bring single-source, Physical and Information-based Intrusion Management and Monitoring capabilities along with Audits, Vulnerability Assessments, Policies, Disaster Recovery Plans and Business Continuity Plans to companies that do not have the full-time staff or the knowledge base required to provide these services internally.

xDefenders provides a full range of Information Security Services, including Vulnerability Assessments, Security Audits and 24x7 Managed Services. Supporting these tactical security solutions is its Security Operations Center, located in Rochester, professionally staffed 24x7x365.

For more information, contact Jeff Thon of xDefenders at 585-385-2770 or Frank Pisciotta at 585-394-5112 x11.
