March 2004

## **Press Release**

### **New Partnership Creates Comprehensive Information Security Services Firm**

A new partnership between xDefenders of Fairport, NY and ÜberGuard of Avon, NY, offers comprehensive Professional and Managed Security Services.

xDefenders Inc., a Managed Security Services Provider (MSSP) and ÜberGuard Information Security Consulting, LLC, a Professional Security Services firm, have joined forces to offer clients a complete Suite of Security Services. The partnership was forged to bring single-source, affordable, real-time Intrusion Management and Monitoring capabilities along with Vulnerability Assessments, Security Policies, Disaster Recovery Plans and Business Continuity Plans to companies that do not have the full-time staff or the knowledge base required to provide these services internally.

xDefenders provides a full range of Managed Security Services, including Vulnerability Assessments, Security Audits and Managed Services. The partnership combines xDefenders ability to design, deploy and tune firewalls, intrusion detection/prevention systems, Spam/Virus filtering and web content controls, featuring its DefenderWall™ Security Appliance. Supporting these tactical security solutions is its Security Operations Center, located in Rochester. The SOC also provides Network Management and Monitoring and is professionally staffed 24x7x365.

ÜberGuard Information Security Consulting is a policy and process based information security consultancy. ÜberGuard provides Vulnerability Assessments, Security Policies, Disaster Recovery Plans, Business Continuity Plans and Security Awareness Training. As well, ÜberGuard provides turnkey solutions for HIPAA Security, GLBA Security and Sarbanes-Oxley Section 404.

For more information, contact Jeff Thon of xDefenders at 585-425-2260 or Chris Karr of ÜberGuard at 585-226-2635
